Art Unit: 1761

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1,2 and 4 are rejected under 35 U.S.C. 102(e) as being anticipated by Gray (6,759,069).

In regard to claim 1, Gray discloses food condiment slices that can be cheese which have an outer shape corresponding to hamburgers (i.e. round) and wherein the individually sliced pieces of cheese are separated by sheets. Note that Gray discloses either individually wrapping the individual slices so that the slices will inherently have separation sheets therebetween (i.e., the wrapper), or individual separator sheets. See e.g., in this regard, col. 1, para.1 and 2, col. 3,para 4, col.8, lines 15 plus, and col. 19,para. 2. In regard to claims 2 and 4, Gray discloses both circular and elongated rectangular shapes.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Application/Control Number: 10/748,322

Art Unit: 1761

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 3,5, and 6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gray ('069).

Claims 3 and 5 recite a range of dimensions for the circular shape and the rectangular shape, respectively. Gray is silent as to a specific numerical number for the dimensions of the slices. However, Gray discloses that the slice can be applied to sandwiches, hamburgers, hot dogs, etc., and that it can be any desired size and shape necessary for the intended purpose (which is for primarily associating the slice with individual sandwich type products). Thus, although it would appear that in meeting his objective, Gray would inherently provide slices with the recited dimensions, since both Gray and applicant deal with individual portions, it would have been an obvious determination, if necessary, in view of Gray, to provide/determine the dimensions recited. Also, in regard to claim 6, since Gray teaches the slice could be given any desired shape, the particular shape of the slice, i.e., one with rounded corners, is seen to have been an obvious matter of choice.

The remainder of the references cited on the PTO892 forms are cited as pertinent art. For example, Walter (1,952,644) discloses providing sliced cheese in a shape which conforms to a sandwich; Buroff (2,439,840) discloses providing sliced cheese in a variety of shapes; Popenhagen (EP497553) discloses circular cheese slices for hamburgers, etc.
